How to Take Memorable Photos:

- Use the highest quality setting on your digital camera. TIFF format is best if your camera has that setting. If not, JPEG format is acceptable. If you scan the photos, scan them to a high-quality JPEG file.
- Take before and after photographs.
- Take photographs early in the morning or late in the afternoon/evening.
- Watch the orientation of the light as it moves across your site.
- Check the area for debris, spent blooms, or other "ugly" parts.
- Try to get the greatest depth of field for a landscape.
- Bracket shots to experiment with depth of field or exposure.
- Look at a shot from different perspectives; higher, lower, or from a different angle.

Owner's/Owner's Agent Consent:

I/WE hereby grant permission to enter our property or premises for the purpose of photographing and publicizing the landscape project in this competition to the accredited representatives of the Washington Association of Landscape Professionals. It is understood that no fees or charges of any kind are required of the owner.
